

## Clark County Tuberculosis (TB) Skin Test Locations

Working for or volunteering within EOCF oftentimes means you will be in contact with children. To ensure their health and safety, performance standards require a tuberculosis (TB) test be conducted for employees and regular status volunteers. If you have received a TB test within the past twelve (12) months, please provide human resources (for employees) or the volunteer manager (for volunteers) a copy for your file. If you have not had a TB test within the past twelve (12) months, EOCF requires the test to be completed and results to be provided to human resources or the volunteer manager prior to commencement of employment or volunteer service. The following is a list of Clark County providers offering TB testing for non-established patients and patients without insurance. Though all clinics on this list welcome walk-in clients, please call ahead to check clinic hours and TB testing availability. If you are an established patient or have insurance, you may wish to contact your regular provider or a provider within your insurance network to administer your TB test.
